

Mohana Reddy

kmohanareddy@gmail.com

<https://www.linkedin.com/in/mohana-reddy-b86b60279/>

+91- 9182101543

CORE COMPETENCIES

- Digital Transformation
- Cloud Automation
- IT Service Delivery
- Strategic Planning and Execution
- Incident Management
- Change Management
- Project Management
- Risk Mitigation
- Operational Excellence
- Performance Optimization
- Business Continuity Planning
- Stakeholder/ Client Management
- Vendor Management
- Quality Assurance
- Agile/ DevOps
- AI/MLOps

SOFT SKILLS

- Effective Communication
- Problem- Solving
- Collaboration
- Adaptability
- Team Management
- Team Mentoring and Coaching

TECHNICAL SKILLS

- Cloud:** Azure Fundamental **AZ-900**
- Scripting:** Shell, Perl
- Databases:** MySQL, Oracle, DB2
- OS:** Solaris, Linux, Windows, Mainframe MVS
- Data Processing & Orchestration:** Control-M, Azure Batch, Eysshare
- Visualization:** Tableau, Power BI, Splunk
- PMO:** Jira, Confluence
- Agile Methodologies:** Scrum, Kanban
- Monitoring:** BMC Patrol, Splunk
- Tools/Utilities** – BMC Control-M Scheduler 9.20,7.0, 6.4,6.2, BMC Control-M Automation API 9.20, CA7 Scheduler, Endeavor, Peregrine, BMC Remedy, xml, PLSQL Developer, ServiceNow, MOOGSOFT
- ITIL V3 Foundation

PROFILE SUMMARY

- Technology leader with **21+ years** in strategy, engineering operations, and AI-driven transformation across global enterprises.
- Head of Global Batch Services, governing **1M+** daily jobs with **99.9%** availability, leveraging LLM-assisted diagnostics, policy guardrails, and automated runbook generation.
- Orchestrated Control-M APIs and Job-as-Code at scale; delivered **CHF 3M** annual savings via automation, DevOps integration for workflow insights and anomaly triage.
- Directed infrastructure optimization programs achieving **up to 40% CapEx/OpEx reduction**, leveraging cloud modernization, observability, and AI-driven SLO/SLA adherence.
- Eliminated manual monitoring (**CHF 2M saved**) by deploying event-driven automation, predictive alerts, and LLM-powered knowledge retrieval for faster incident resolution.
- Hands-on with **Azure, Control-M, Unix, SRE, Shell/Perl, Power BI**
- Build-and-scale leader: grew high-performing engineering teams from grads to experts, establishing standards for AI safety, model evals, cost controls, and platform reliability.
- Trusted advisor to senior stakeholders—translating business outcomes into AI roadmaps, platform architectures, and governance-by-design patterns.
- Recognized as a visionary operator who marries cost efficiency with innovation—shipping AI that is observable, compliant, and tied to measurable business value.

CAREER TIMELING

2013–Present: Associate Director (AD) – **UBS** (Union Bank of Switzerland) (**Formerly Credit Suisse**), Pune

2009–2013: Assistant Vice President (AVP) – **Credit Suisse Services AG**, Singapore

2008–2009: Senior IT Engineer – **Dicetek (Sing) Pte Ltd**, Singapore

2007–2008: Systems Engineer – **Suvin Technologies pte Ltd**, Singapore

2005–2007: Technical Analyst – **ANZ (Australia Newzeland Banking Ltd)**, Bangalore

2004- 2005: Production Control Analyst – **ACS (Affiliated Computer Services Pvt Ltd.)**, Bangalore

WORK EXPERIENCE

Global Head of Batch Engineering, Scheduling and Operations | Credit-Suisse|UBS| Pune | Dec’13-Present

Key Result Areas:

Technical Oversight

- Designed Batch Infrastructure (API-first):** Created a high-level architecture aligned to IT and business needs, exposing batch capabilities via versioned REST APIs/webhooks, secured with OAuth2/Microsoft Entra, and monitored through API SLAs.
- CI/CD for Batch:** Implemented pipelines that automate commit-to-deploy using API calls—Git triggers → build → environment provisioning (ARM/Bicep/Terraform APIs) → deployment (K8s/Control-M/Release APIs) → post-deploy health checks and promotion via gateway/test APIs—enabling rapid, reliable, continuous delivery.
- Seamless Cloud/Container integration:** Integrated new tech with legacy systems using Azure Dockers/Kubernetes/Control-M Automation APIs; built adapters for idempotent calls, retries/backoff, and emitted telemetry through API gateways and Open Telemetry.
- Control-M Migrations:** Led migrations and patching activities; performed new version testing and sign-off; managed upgrades and user access governance.

Operational Excellence

- Streamline Workflows:** Analyzed and refine batch processing workflows to eliminate bottlenecks and reduce processing time with implementation of **Batch Impact Manager**.
- Automation:** Implemented automation tools like **Eysshare, Blue Prism, Geneos, Airflow** to minimize manual intervention and increase process consistency.
- Process Improvement:** Integrated various **API** like Snow, Control-M and Datalake to reduce the turnaround time for the Batch escalation and resolution process
- ITIL Governance:** Ensured the team is following the Incident, Change and Problem Management process effectively.

ACHIEVEMENTS

- Spearheaded the development of a comprehensive Control-M API training program, including BIM implementation and EyeShare automation, featuring audio-visual modules for organization-wide adoption, reaching 10,000+ employees nationwide
- Automated Control-M Job failure/Soft Alert escalation, saving **750 man-hours** monthly, enhancing time-to-market for application teams, and reducing manual work by **95%** for the monitoring team.
- Transitioned Engineering team, saving **200K CHF** annually without compromising service stability.
- Led the team for development of Job-as-Code using CI/CD pipelines, enhancing deployment efficiency and delivering CHF 6M in cost savings through process improvements.
- Led a comprehensive IT infrastructure modernization project, resulting in a **40%** increase in system **reliability** and a **30%** reduction in **operational** costs
- Automated Control-M batch failure incident resolution process i.e 13K incidents per month through eyeShare automation using JAVA based API with integration of Control-M V9, Service Now & Eyseshare platform. This automation provided high QoS i.e significant improvement in Timely action and accuracy, 100% reduction in human error & elimination of manual efforts by **96%**.

PREVIOUS EXPERIENCE

- Aug 2008 – May 2009: Senior IT Engineer (Project: **SONY Electronics Asia Pacific Pte. Ltd**) at Dicetek (Sing) Pte Ltd, Singapore
- May 2007 – Aug 2008: Senior IT Engineer (Project: **CREDIT SUISSE AG**) at Suvin Technologies pte Ltd, Singapore
- March 2005 – April 2007: Technical Analyst at **ANZ (Australia Newzeland Banking Ltd)**, Bangalore
- Sep 2004 – Feb 2005: Production Control Analyst at **ACS (Affiliated Computer Services Pvt Ltd.)**, Bangalore

EDUCATION

2002

MCA (Master of Computer Applications) from Manonmaniam Sundaranar University, Tirunelveli, Tamil Nadu, INDIA.

Strategic Planning and Management:

- Developed and implemented strategic IT plans to align with organizational goals, enhancing operational efficiency by conducting SWOT analysis on existing legacy processes and integrating latest technologies to **transform Batch**.
- Monitored and analyzed team and service performance metrics (**KPI/CPI**), identifying areas for improvement, and implementing corrective actions. Implemented **volumetric discount** in the Vendor contract to realize the benefit with process improvement.
- Managed budgets, resources, and timelines to ensure project deliverables were met without any major defects.
- Developed and implement risk mitigation plans to address identified risks.
- Ensured robust business continuity and disaster recovery plans are in place and conducted every year successfully to be complaint with BCM. Enhanced the DR timing for Batch from 6 Hrs. to 40 Minutes by implementing **OTV** and **Datagaurd** Solution

Team Building and Collaboration:

- Collaborated with cross-functional teams (perm and vendor staff) to drive process improvements and operational efficiency.
- Fostered a positive work environment, encouraging teamwork, collaboration, and employee development.
- Implemented the cross training between the teams to enhance the Skill Matrix to the teams and eliminated single **point of failure**.

Client Management and Business Development:

- Maintained strong client relationships, ensuring high levels of customer satisfaction and addressing concerns by implementing **Voice of Customer (VoC)** approach.
- Identified opportunities to improve business processes and productivity, contributing to overall business growth
- Aligned organizational objectives with the company mission to integrate work strategies and increase business growth.

Policy Development and Implementation:

- Creating and implementing the organization's IT policy and best practice manuals.
- Conducted routine Batch and data security audits to ensure adherence to compliance and audit
- Working closely with the regulators (**SOX, FINMA, RBI, MAS**) for various IT controls.

SME Batch/Service Delivery Lead/Planning, QA & IM | Credit-Suisse | Singapore | June'09- Dec'13

Key Result Areas:

Service Delivery Lead:

- Developed and implemented a service delivery strategy that aligns with Credit Suisse goal of Batch Modernization.
- Transformed Batch Organization to Batch as a Service by implementing and automating various process flows.
- Defined, negotiated, and managed Service Level Agreements (SLAs) with Cognizant to make sure no impact to Batch service.
- Monitored the key performance indicators (KPIs) and Critical Performance indicators (CPI's) to ensure services are delivered as per SLAs.
- Imposed penalties as per the contract in case any deviation from the SLA.
- Lead Batch Quality assurance for alert reduction and repetitive job failure reduction
- Actively participated in **Agile Ceremonies**, daily stand-ups, sprint planning, showcases, and retrospective ceremonies to drive continuous improvement.
- Prioritized, sequenced, and maintained the **Product Backlog**
- Service oversight to ensure seamless, end-to-end service delivery from vendor managed services.
- Ensure 'Audit Readiness "and act as interface between auditors and managed services to provide quality and on time audit response with proper evidence

Engineering/Infrastructure Projects:

- Developed Control-M Server package within one month to save approximately **200K USD**, which BMC was charging to provide the service.
- Migrated Control-M infrastructure from legacy Solaris to Redhat in span on 8 months.
- Conducted the PoC for **HCL Workload** Automation
- Designed a Control-M **DR Environment** as a regulatory requirement for Finance team maintain Bank's book of records
- Splunk** implementation for logs retention, audit remediation and monitoring solution for L0/L1 teams
- Event Management Integration to automate alert process
